

Sample School User Accounts on MyIIRC

Welcome. This tutorial is your guide for setting up a user account to access the Sample School on MyIIRC for training and presentation purposes. The process of registering for Sample School is quick and easy.

Sample School gives you access to the data dashboard and other resources on MyIIRC using anonymous student data. The module has all the look and functionality of MyIIRC but the school, student names, and any other identifying characteristics have been masked to assure confidentiality of the data. This makes Sample School a very useful resource for training workshops, professional development meetings, college courses, school board presentations, or any general audience for whom public viewing is desirable. The Sample School data dashboard includes school improvement e-plans, resources, and other features.
